

## Progress on Sanitation (SDG target 6.2)

57%

of the world's population uses a safely managed sanitation service (SDG indicator 6.2.1a, 2022)

- Data provider: WHO and UNICEF through the [Joint Monitoring Programme for Water Supply, Sanitation and Hygiene \(JMP\)](#)
- Available data series: 2000-2022
- Number of countries (and areas) reporting in the last five years: 139
- Proportion of world population covered by reporting in the last five years: 86%
- Proportion of world economy covered by reporting in the last five years: 92%
- Proportion of world land area covered by reporting in the last five years: 82%
- [Learn more about the indicator and how it is monitored](#)  
[Read the latest progress report here](#)

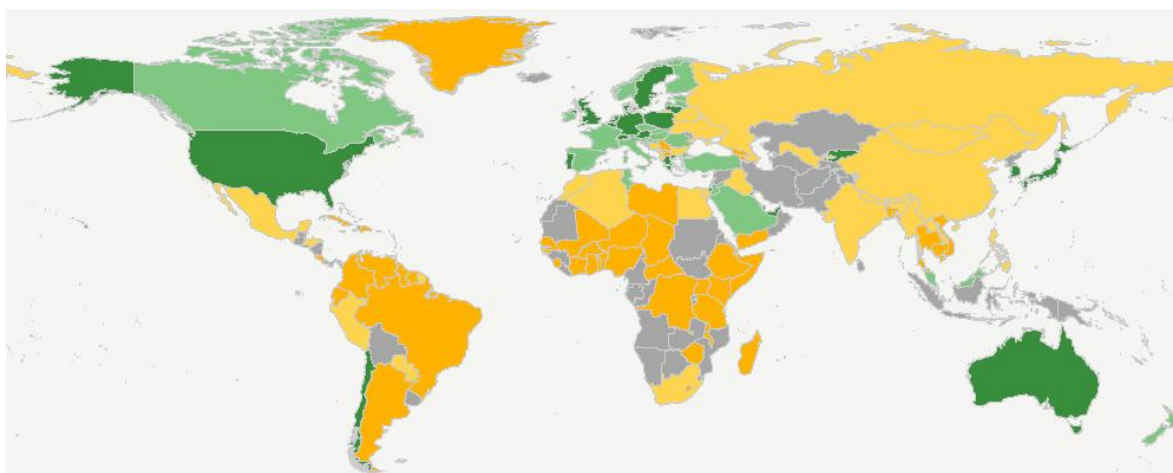

Adequate sanitation and hygiene services at home, in education settings and workplaces are essential to make sure that women can participate in society on equal terms.

SDG target 6.2 is: 'By 2030, achieve access to adequate and equitable sanitation and hygiene for all and end open defecation, paying special attention to the needs of women and girls and those in vulnerable situations.'

To track progress towards the target, indicator 6.2.1a monitors the proportion of population using safely managed sanitation services.

## Global status of indicator 6.2.1a Proportion of population using safely managed sanitation services (2022) <sup>[1]</sup>

The designations employed and the presentation of material on this map do not imply the expression of any opinion whatsoever on the part of the United Nations concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries. Dotted lines represents approximately the Line of Control in Jammu and Kashmir agreed upon by India and Pakistan. The final status of Jammu and Kashmir has not been agreed upon by the parties. Final boundary between the Republic of Sudan and the Republic of South Sudan has not yet been determined. Final status of the Abyei area is not yet determined. A dispute exists between the Governments of Argentina and the United Kingdom of Greater Britain and Northern Ireland concerning the sovereignty over the Falkland Islands (Malvinas).

### Proportion of population (%)

## Progress over time of indicator 6.2.1a Proportion of population using safely managed sanitation services <sup>[2]</sup>

**Status in different countries (or areas) of indicator 6.2.1a Proportion of population using safely managed sanitation services (2022) <sup>[4]</sup>**

### Status in different SDG regions of indicator 6.2.1a Proportion of population using safely managed sanitation services (2022) <sup>[5]</sup>

## Status of different components of sanitation services

### 6.2.1a Proportion of population using safely managed sanitation services (2022) <sup>[6]</sup>

### 6.2.1a Proportion of population using safely managed sanitation services (2022) <sup>[7]</sup>

## Description of indicators

[1]

### **6.2.1a Proportion of population using safely managed sanitation services > Safely managed service > Overall**

Use of improved facilities which are not shared with other households and where excreta are safely disposed in situ or transported and treated off-site.

[2]

### **6.2.1a Proportion of population using safely managed sanitation services > Safely managed service > Overall**

Use of improved facilities which are not shared with other households and where excreta are safely disposed in situ or transported and treated off-site.

[3]

### **6.2.1a Proportion of population using safely managed sanitation services > Safely managed service > Overall**

Use of improved facilities which are not shared with other households and where excreta are safely disposed in situ or transported and treated off-site.

[4]

### **6.2.1a Proportion of population using safely managed sanitation services > Safely managed service > Overall**

Use of improved facilities which are not shared with other households and where excreta are safely disposed in situ or transported and treated off-site.

[5]

### **6.2.1a Proportion of population using safely managed sanitation services > Safely managed service > Overall**

Use of improved facilities which are not shared with other households and where excreta are safely disposed in situ or transported and treated off-site.

### **6.2.1a Proportion of population using safely managed sanitation services > At least basic service**

Since safely managed services meet the criteria for basic services, the statistics on the population with basic services often include the population with safely managed services. The term at least basic services is used to be clear that the statistic refers to populations with either basic or safely managed services.

### **6.2.1a Proportion of population using safely managed sanitation services > Basic service**

Use of improved facilities which are not shared with other households.

### **6.2.1a Proportion of population using safely managed sanitation services > Limited service**

Use of improved facilities shared between two or more households.

### **6.2.1a Proportion of population using safely managed sanitation services > Open defecation**

Disposal of human faeces in fields, forests, bushes, open bodies of water, beaches and other open spaces or with solid waste.

### **6.2.1a Proportion of population using safely managed sanitation services > Unimproved**

Use of pit latrines without a slab or platform, hanging latrines or bucket latrines.

[6]

### **Proportion of population using an improved sanitation facility > Improved latrine and other**

Use of improved latrines and other sanitation facilities not shared with other households.

### **Proportion of population using an improved sanitation facility > Septic tank**

Use of sanitation facilities connected to septic tanks not shared with other households.

### **Proportion of population using an improved sanitation facility > Sewer**

Use of sanitation facilities connected to sewer networks not shared with other households.

[7]

### **6.2.1a Proportion of population using safely managed sanitation services > Safely managed service > Overall**

Use of improved facilities which are not shared with other households and where excreta are safely disposed in situ or transported and treated off-site.

### **6.2.1a Proportion of population using safely managed sanitation services > At least basic service**

Since safely managed services meet the criteria for basic services, the statistics on the population with basic services often include the population with safely managed services. The term at least basic services is used to be clear that the statistic refers to populations with either basic or safely managed services.

### **6.2.1a Proportion of population using safely managed sanitation services > Basic service**

Use of improved facilities which are not shared with other households.

### **6.2.1a Proportion of population using safely managed sanitation services > Limited service**

Use of improved facilities shared between two or more households.

### **6.2.1a Proportion of population using safely managed sanitation services > Unimproved**

Use of pit latrines without a slab or platform, hanging latrines or bucket latrines.

### **6.2.1a Proportion of population using safely managed sanitation services > Open defecation**

Disposal of human faeces in fields, forests, bushes, open bodies of water, beaches and other open spaces or with solid waste.

## About

Through the UN-Water Integrated Monitoring Initiative for Sustainable Development Goal (SDG) 6, the United Nations seeks to support countries in monitoring water- and sanitation-related issues within the framework of the 2030 Agenda for Sustainable Development, and in compiling country data to report on global progress towards SDG 6. The Initiative brings together the United Nations agencies who are formally mandated to compile country data for the purpose of global reporting on SDG 6.

To learn more about water and sanitation in the 2030 Agenda for Sustainable Development, and the Integrated Monitoring Initiative for SDG 6, visit our website:

[www.sdg6monitoring.org](http://www.sdg6monitoring.org)

Monitoring SDG 6 involves a wide range of stakeholders across different sectors and levels of government. To enable a comprehensive assessment and analysis of the state of water resources and possible development paths, one of the monitoring effort's key objectives is to collate all the information, in support of an integrated management approach that helps reduce institutional fragmentation. For this reason, the Integrated Monitoring Initiative has developed the SDG 6 Data Portal, which brings together data on all the SDG 6 global indicators, as well as other key social, economic and environmental data.

To explore the data and assess progress towards SDG 6, and generate snapshots such as this one, visit our portal: [www.sdg6data.org](http://www.sdg6data.org).
