

Progress on Drinking Water (SDG target 6.1)

73%

of the world's population uses a safely managed drinking water service (SDG indicator 6.1.1, 2022)

- Data provider: WHO and UNICEF through the [Joint Monitoring Programme for Water Supply, Sanitation and Hygiene \(JMP\)](#)
- Available time series: 2000-2022
- Number of countries (and areas) reporting in the last five years: 148
- Proportion of world population covered by reporting in the last five years: 52%
- Proportion of world economy covered by reporting in the last five years: 64%
- Proportion of world land area covered by reporting in the last five years: 63%
- [Learn more about the indicator here](#)
- [Read the latest progress report here](#)

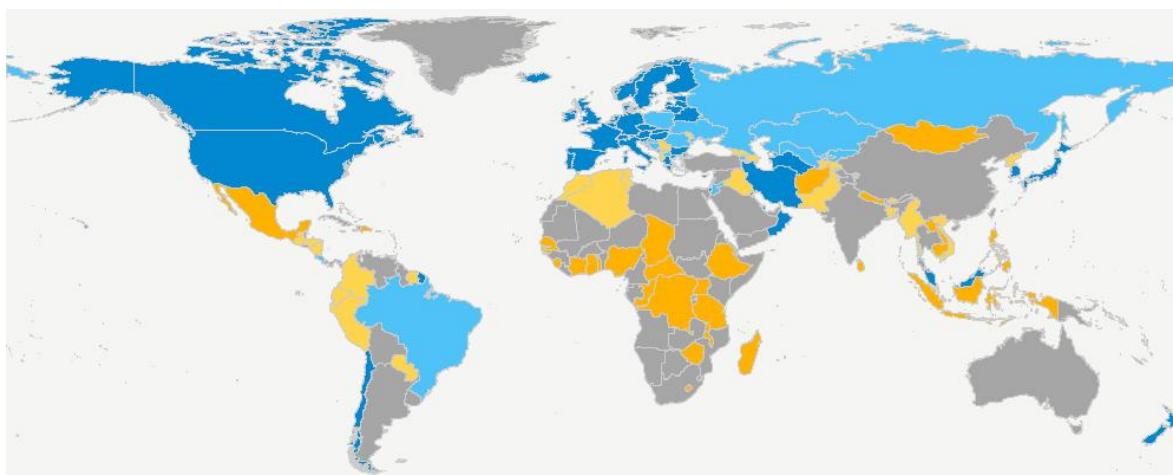

Access to safe drinking water in homes, healthcare facilities, schools and workplaces effectively reduces water-borne disease and malnutrition, which are leading causes of death among children under five.

SDG target 6.1 is: 'By 2030, achieve universal and equitable access to safe and affordable drinking water for all.'

To track progress towards the target, indicator 6.1.1 monitors the proportion of population using safely managed drinking water services.

Global status of indicator 6.1.1 Proportion of population using safely managed drinking water services (2022) ^[1]

The designations employed and the presentation of material on this map do not imply the expression of any opinion whatsoever on the part of the United Nations concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries. Dotted lines represent approximately the Line of Control in Jammu and Kashmir agreed upon by India and Pakistan. The final status of Jammu and Kashmir has not been agreed upon by the parties. Final boundary between the Republic of Sudan and the Republic of South Sudan has not yet been determined. Final status of the Abyei area is not yet determined. A dispute exists between the Governments of Argentina and the United Kingdom of Great Britain and Northern Ireland concerning the sovereignty over the Falkland Islands (Malvinas).

Proportion of population (%)

Progress over time of indicator 6.1.1 Proportion of population using safely managed drinking water services ^[2]

Status in different countries (or areas) of indicator 6.1.1 Proportion of population using safely managed drinking water services (2022) ^[4]

Status in different regions of indicator 6.1.1 Proportion of population using safely managed drinking water services (2022) ^[5]

Status of different components of drinking water services

6.1.1 Proportion of population using safely managed drinking water services (2022) ^[6]

Proportion of population using an improved drinking-water source (2022) ^[7]

Source data indicator 6.1.1 Proportion of population using safely managed drinking water services^[8]

Description of indicators

[1]

6.1.1 Proportion of population using safely managed drinking water services > Safely managed service > Overall

Drinking water from an improved water source which is located on premises, available when needed and free from faecal and priority chemical contamination.

[2]

6.1.1 Proportion of population using safely managed drinking water services > Safely managed service > Overall

Drinking water from an improved water source which is located on premises, available when needed and free from faecal and priority chemical contamination.

[3]

6.1.1 Proportion of population using safely managed drinking water services > Safely managed service > Overall

Drinking water from an improved water source which is located on premises, available when needed and free from faecal and priority chemical contamination.

[4]

6.1.1 Proportion of population using safely managed drinking water services > Safely managed service > Overall

Drinking water from an improved water source which is located on premises, available when needed and free from faecal and priority chemical contamination.

[5]

6.1.1 Proportion of population using safely managed drinking water services > Safely managed service

Drinking water from an improved water source which is located on premises, available when needed and free from faecal and priority chemical contamination. Improved drinking water sources are those that have the potential to deliver safe water by nature of their design and construction, and include: piped water, boreholes or tubewells, protected dug wells, protected springs, rainwater, and packaged or delivered water.

6.1.1 Proportion of population using safely managed drinking water services > At least basic service

Since safely managed services meet the criteria for basic services, the statistics on the population with basic services often include the population with safely managed services. The term at least basic services is used to be clear that the statistic refers to populations with either basic or safely managed services.

6.1.1 Proportion of population using safely managed drinking water services > Basic service

Drinking water from an improved source, provided collection time is not more than 30 minutes for a roundtrip including queuing.

6.1.1 Proportion of population using safely managed drinking water services > Limited

Drinking water from an improved source for which collection time exceeds 30 minutes for a roundtrip including queuing.

6.1.1 Proportion of population using safely managed drinking water services > Unimproved

Drinking water from an unprotected dug well or unprotected spring.

6.1.1 Proportion of population using safely managed drinking water services > Surface water

Drinking water directly from a river, dam, lake, pond, stream, canal or irrigation canal

[6]

Proportion of population using an improved drinking-water source > Piped improved

Drinking water from a piped water sources.

Proportion of population using an improved drinking-water source > Non-piped improved

Drinking water from a non-piped improved water sources (e.g. boreholes or tubewells, protected dug wells, protected springs, rainwater, and packaged or delivered water).

[7]

6.1.1 Proportion of population using safely managed drinking water services > Safely managed service > Overall

Drinking water from an improved water source which is located on premises, available when needed and free from faecal and priority chemical contamination.

6.1.1 Proportion of population using safely managed drinking water services > At least basic service

Since safely managed services meet the criteria for basic services, the statistics on the population with basic services often include the population with safely managed services. The term at least basic services is used to be clear that the statistic refers to populations with either basic or safely managed services.

6.1.1 Proportion of population using safely managed drinking water services > Basic service

Drinking water from an improved source, provided collection time is not more than 30 minutes for a roundtrip including queuing.

6.1.1 Proportion of population using safely managed drinking water services > Limited

Drinking water from an improved source for which collection time exceeds 30 minutes for a roundtrip including queuing.

6.1.1 Proportion of population using safely managed drinking water services > Unimproved

Drinking water from an unprotected dug well or unprotected spring.

6.1.1 Proportion of population using safely managed drinking water services > Surface water

Drinking water directly from a river, dam, lake, pond, stream, canal or irrigation canal

About

Through the UN-Water Integrated Monitoring Initiative for Sustainable Development Goal (SDG) 6, the United Nations seeks to support countries in monitoring water- and sanitation-related issues within the framework of the 2030 Agenda for Sustainable Development, and in compiling country data to report on global progress towards SDG 6. The Initiative brings together the United Nations agencies who are formally mandated to compile country data for the purpose of global reporting on SDG 6.

To learn more about water and sanitation in the 2030 Agenda for Sustainable Development, and the Integrated Monitoring Initiative for SDG 6, visit our website:

www.sdg6monitoring.org

Monitoring SDG 6 involves a wide range of stakeholders across different sectors and levels of government. To enable a comprehensive assessment and analysis of the state of water resources and possible development paths, one of the monitoring effort's key objectives is to collate all the information, in support of an integrated management approach that helps reduce institutional fragmentation. For this reason, the Integrated Monitoring Initiative has developed the SDG 6 Data Portal, which brings together data on all the SDG 6 global indicators, as well as other key social, economic and environmental data.

To explore the data and assess progress towards SDG 6, and generate snapshots such as this one, visit our portal: www.sdg6data.org.
